

Record every phase of an operation on colour film . . .

with the

SUPER

HANAULUX

operating lamp

with built-in camera and flash equipment

The photographic equipment consists of a Robot Camera, two electronic flashes and a focusing device, with a remote control release, which can be actuated by the surgeon himself without disturbing the operation.

The camera has a Tele-Xenar 1 : 3.8 lens, giving sharp definition over a 25 × 25 cm. field at an object distance of 3 ft. 6 in.

Up to 54 exposures can be taken on standard 35-mm. film.

THE "HUNDRED NINETY"

MOBILE WARD UNIT

DESIGNED to energize a twin-focus rotating anode tube, the "Hundred-Ninety" enables short exposure tele-radiographic chest films to be taken on patients unfit to be moved to the X-ray Department. The results are capable of comparison with radiographs taken on high-powered fixed units.

Treating Bucco-Pharyngeal Infections Without Recourse to Antibiotics

The dangers of using antibiotics for local application in the treatment of infections is constantly being stressed in the medical press. There has been a gradual increase in organisms resistant to antibiotics and alarm has been expressed at the number of cases where patients have become sensitised to an antibiotic during treatment.

Dequadin, which has a wider antimicrobial spectrum than penicillin, is not an antibiotic and Dequadin Lozenges can be used freely in the treatment of infections of the mouth and throat without any fear of sensitising the patient and without the risk of resistant strains developing.

DEQUADIN

LOZENGES

In tubes of 20 lozenges each containing 0.25 mg. decamethylene-bis
(4-aminoquinaldinium chloride).

ILFORD

Red Seal

Of the many advantages to be gained from the use of Ilford Red Seal X-ray film, none is of greater significance than the very considerable reduction in radiation exposure made possible by the availability of such an extremely high order of sensitivity. As a screen-type film of unrivalled speed, Red Seal is at the same time outstanding in its consistently high quality and all-round performance. Thus, far from being a film to be reserved merely for occasions when purely technical considerations make high speed desirable, it is eminently suitable for routine use, giving radiographs of excellent diagnostic quality while minimizing radiation hazards to subject and operator alike.

in the chemotherapy of Tuberculosis...

The intramuscular administration of Viomycin,* a tuberculostatic antibiotic, is indicated in selected cases. e.g., presence of drug-resistant strains of *M. tuberculosis* or intolerance to the usual antituberculous drugs. It should be used where possible in combination with other antituberculous therapeutic agents.

Viomycin is presented as Viomycin sulphate in the form of a sterile dry powder to which water is added for injection.

Announcing the first volume in the John Alexander Monograph Series . . .

THE SURGICAL MANAGEMENT OF PULMONARY TUBERCULOSIS

Edited by JOHN D. STEELE

This is the first volume in an important new series which has been planned to commemorate the work of the late John Alexander. The contributors are thoracic surgeons who were trained by Alexander, together with two of his close medical associates. Further titles already in preparation are *Postoperative Chest X-Ray Atlas* (edited by Himan T. Langston) and *The Treatment of Bronchial Neoplasms* (edited by Robert R. Shaw).

In this volume John C. Jones writes on pulmonary resection for tuberculosis in the pre-chemotherapy era, including his own experience in the 19.0's; Max Chamberlain on segmental resection; Herbert Sloan and Roger Milnes on the indications, contra-indications and results of resection. Problems and methods of the reduction in the size of the pleural cavity with pulmonary resection are discussed in a chapter on combined collapse and resection.

Some of the historical aspects of the surgery of pulmonary tuberculosis have been drawn from John Alexander's books published in 1925 and 1937, and from the uncompleted manuscript of the third book on which he was working at the time of his death.

Other chapters include a discussion of the surgical management of tuberculosis in the mentally ill (a neglected subject), and a comprehensive section (by Winthrop N. Davey and John B. Barnwell) on chemotherapy.

CASSELL MEDICAL BOOKS

THE ANATOMY OF CONGENITAL PULMONARY STENOSIS

SIR RUSSELL BROCK

With the possibility of surgical relief of pulmonary stenosis it has become obvious that the older anatomical descriptions are inadequate as a basis for surgical attack. In this important monograph the author confirms or modifies older anatomical descriptions and adds his own valuable observations on the living heart.

A MODERN
'TWO-PHASE' ASTHMA THERAPY
is provided by the double action of

ISO-BRONCHISAN

... a treatment of outstanding efficiency and convenience for your asthmatic patients.

FORMULA

Each tablet contains
Isopropyl-Nor-Adrenaline
Isoprenaline sulphate
gr. $\frac{1}{4}$ 0.015 Gm.
Ephedrine hydrochlor.
gr. 2.5 0.025 Gm.
Theophylline gr. 2 0.13 Gm.

PACKING

Tablet of 20 tablets
Bottle of 100 tablets

DOSAGE

1 or 2 tablets, two or three
times daily, according to
individual needs.

ISO-BRONCHISAN offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating of easily dissolved Isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, results in the immediate relief of symptoms. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long-sustained anti-spasmodic action on the bronchial smooth muscle.

SILTEN LIMITED . SILTEN HOUSE . HATFIELD . HERTS . ENGLAND

EMERGENCIES IN GENERAL PRACTICE

This book comprises 57 specially commissioned articles on medical emergencies which appeared originally in the *British Medical Journal*.

Contents include haemorrhage and thrombosis, cardio-respiratory crises, anaesthesia and hazards of therapy, acute abdominal cases, obstetrics, fits and coma, electrocution, burns and gassing, poisoning, acute psychiatric states, and special and minor surgery.

Invaluable to all doctors everywhere.

470 pages, cloth bound with full index. 25s. net (by post—inland 26s. 6d., overseas 26s.).

CLINICAL PATHOLOGY IN GENERAL PRACTICE

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the *British Medical Journal*. Each article has been revised and brought up-to-date by its author. The book gives authoritative information on available laboratory facilities; reliable tests and which to use; techniques for collecting and preserving specimens; interpretation of results and significance of abnormal findings.

321 pages. Price 21s. (by post—inland 22s. 3d., overseas 21s. 9d.).

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Second Collection

Third Collection—with
Classified Contents List
to volumes 1, 2 and 3

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable textbooks.

25s. each (by post—inland 26s. 6d., overseas 26s.).

"ANY QUESTIONS?"

Second Series

Third Series—with
Cumulative Index

These pocket-size volumes each contain some 200 questions and expert answers from the "Any Questions?" pages of the *British Medical Journal*. Each answer has been chosen for its practical value to doctors in their day-to-day work. Many deal with subjects not covered in the standard textbooks.

The Third volume has a cumulative index to all the answers appearing in the three books in the series.

7s. 6d. each (by post 8s.).
