# INTRODUCING

# 'Pasinah-302'

**WANDER**

FOR PATIENTS' CONVENIENCE  
AND COLLABORATION  
DURING TUBERCULOTHERAPY

## WHY '302'?

This new addition to the Pasinah range of concurrent PAS-Isoniazid products has been designed specifically to encourage, throughout treatment, patients' fullest co-operation in order to obviate the known dangers which may result from default in taking medication.

## ADVANTAGES

- Total 24-hour intake in a single convenient pack.
- Only 6 cachets per 24 hours, to provide 12 g. Sodium Aminosalicylate B.P. and 300 mg. Isoniazid B.P.
- Flexibility of single dosage maintained:  
3 cachets twice daily  
or 2 cachets three times daily  
according to your instructions.
- Acceptability improved, because smooth cachets without sharp edges make swallowing easier; because the number to be taken on each occasion is reduced to a minimum:  
*never more than 3 cachets per single dose.*

## FORMULA

Each 'Pasinah-302' cachet contains:  
Sodium Aminosalicylate B.P. 2 g.  
Isoniazid B.P. 50 mg.

## PRESENTATION

Tins of 180 cachets (30 days' supply) packed in daily units of 6 cachets.

Terms for institutional quantities gladly sent on request.

---

*We are also pleased to announce that we now offer our established range of 'Pasinah' products in an improved, smaller flanged-cachet form, the doses of the contents remaining unchanged.*

*This alteration of form has been devised likewise especially for the greater convenience of patients, and, by extension, to induce their better co-operation.*

## Disposable Injector

*The new method of  
injection without hypodermic syringe*  
**for speed . . . for convenience . . . for safety**

When a drug has been therapeutically proved the next step in the service of medicine is to seek the most acceptable and convenient way of presenting it. To this end the 'Distampin' Disposable Injector—a new sterile unit consisting of a single-dose ampoule and hypodermic needle—is now available. The contents of the ampoule are under pressure for automatic injection without a syringe.

*The 'Distampin' Injector is sterile—no sterilization is required except the preparation of the patient's skin.*

Apart from its convenience and time-saving advantages, the risk of contact allergy in those handling drugs (e.g., antibiotics) is eliminated.

### AVAILABLE TO HOSPITALS

**Kodak  
Blue  
Sensitive  
Flurodak  
film**  
for the  
'Odelca' camera

This negative film is designed to provide maximum sensitivity to the blue fluorescent screen of the 100×100mm 'Odelca' camera. It is supplied in boxes of 50 sheets, without interleaving paper, each sheet being die-cut to precise dimensions. It can be relied upon for smoothness of operation in the Separator Cassette, and gives a really fine-grain image with adequate contrast. Process by standard X-ray film safelighting.

*Also available in 4" × 5" and 4" × 10" sheets, packed in boxes of 75.*

## EMERGENCIES IN GENERAL PRACTICE

This book comprises 57 specially commissioned articles on medical emergencies which appeared originally in the *British Medical Journal*.

Contents include haemorrhage and thrombosis, cardio-respiratory crises, anaesthesia and hazards of therapy, acute abdominal cases, obstetrics, fits and coma, electrocution, burns and gassing, poisoning, acute psychiatric states, and special and minor surgery.

Invaluable to all doctors everywhere.

470 pages, cloth bound with full index, 25s. net (by post 26s. 9d.)

## CLINICAL PATHOLOGY IN GENERAL PRACTICE

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the *British Medical Journal*. Each article has been revised and brought up-to-date by its author. The book gives authoritative information on available laboratory facilities; reliable tests and which to use; techniques for collecting and preserving specimens; interpretation of results and significance of abnormal findings.

321 pages. Price 21s. (by post 22s. 3d.).

## REFRESHER COURSE FOR GENERAL PRACTITIONERS

*Third Collection—with  
Classified Contents List  
to volumes 1, 2 and 3*

This book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

It is invaluable to general practitioners and residents as a practical reference book, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as an up-to-date and reliable textbook.

25s. (by post 26s. 9d.).

## "ANY QUESTIONS?"

*Third Series—with  
Cumulative Index*

This pocket-size volume contains some 200 questions and expert answers from the "Any Questions?" pages of the *British Medical Journal*. Each answer has been chosen for its practical value to doctors in their day-to-day work. Many deal with subjects not covered in the standard textbooks.

This volume has a cumulative index to all the answers appearing in the three books in the series.

7s. 6d. (by post 8s. 3d.).
