R ESPIRATORY MEDICINE

DIAGNOSIS OF DISEASES OF THE CHEST (3/E) Vol. 2

by Fraser, Paré, Paré, Fraser, Genereux

This classic text integrates all available information on thoracic diseases, covering definitions, aetiology and pathogenesis, pathology, normal and pathologic physiology, roentgenology, clinical manifestations and prognosis. For the first time an extensive glossary of both radiologic and clinical terms has been added. Major revisions include expanded coverage of histological anatomy and tables of differential diagnosis which have been extended.
