Editor, *British Medical Journal*

Notice to contributors

Thorax is the journal of the British Thoracic Society. It is intended primarily for the publication of original work relevant to diseases of the thorax. Contributions may be submitted by workers who are not members of the society. The following notes are for the guidance of contributors. Papers may be returned if presented in an inappropriate form.

SUBMISSION AND PRESENTATION The original typescript and three copies of all papers should be sent to the Executive Editor, Dr S G Spiro, *Thorax* Editorial Office, Private Patients' Wing, University College Hospital, 25 Grafton Way, London WC1E 6DB. Editorial and historical articles are normally commissioned but the Editor may accept uncommissioned articles of this type. Manuscripts must be accompanied by a declaration, signed by all authors, that the paper is not under consideration by any other journal at the same time and that it has not been accepted for publication elsewhere. The typescript should bear the name and address of the author who will deal with editorial correspondence, and also a fax number if possible. Authors may be asked to supply copies of similar material they have published previously. If requested, authors shall produce the data upon which the manuscript is based for examination by the editor. Papers are accepted on the understanding that they may undergo editorial revision. In the event of rejection one copy of the text may be retained for future reference. **Authors are asked to supply the name and address of a possible referee for their work.**

Authors should follow the requirements of the International Steering Committee of Medical Editors (*BMJ* 1979;i:532-5). Papers must be typed in double spacing with wide margins for correction and on one side of the paper only. They should include a structured abstract on a separate sheet (see below). Papers should contain adequate reference to previous work on the subject. Descriptions of experimental procedures on patients not essential for the investigation or treatment of their condition must include a written assurance that they were carried out with the informed consent of the subjects concerned and with the agreement of the local ethics committee.

ABSTRACT Abstracts, which should be of no more than 250 words, should state clearly why the study was done, how it was carried out (including number and brief details of subjects, drug doses, and experimental design), results, and main conclusions. They should be structured to go under the headings "Background", "Methods", "Results", and "Conclusions".

KEYWORDS Authors should include on the manuscript up to three key words or phrases suitable for use in an index.

STATISTICAL METHODS The Editor recommends that authors refer to Altman DG, Gore SM, Gardner MJ, Pocock SJ. Statistical guidelines for contributors to medical journals. *BMJ* 1983;286:1489-93. Authors should name any statistical methods used and give details of randomisation procedures. For large numbers of observations it is often preferable to give mean values and an estimate of the scatter (usually 95% confidence intervals) with a footnote stating from whom the full data may be obtained. The power of the study to detect a significant difference should be given when appropriate and may be requested by referees. Standard deviation (SD) and standard error (SE) should be given in parenthesis (not preceded by \pm) and identified by SD or SE at the first mention.

SI UNITS The units in which measurements were made should be cited. If they are not SI units the factors for conversion to SI units should be given as a footnote. This is the responsibility of the author.

ILLUSTRATIONS Line drawings, graphs, and diagrams should be prepared to professional standards and submitted as originals or as unmounted glossy photographic prints. Particular care is needed with photomicrographs, where detail is easily lost—it is often more informative to show a small area at a high magnification than a large area. Scale bars should be used to indicate magnification. The size of the symbols and lettering (upper and lower case rather than all capitals) and thickness of lines should take account of the likely reduction of the figure—usually to a width of 65 mm. Three copies of each illustration should be submitted. Each should bear a label on the back marked in pencil with the names of the authors and the number of the figure, and the top should be indicated. Legends should be typed on a separate sheet. Authors must pay for colour illustrations.

REFERENCES Responsibility for the accuracy and completeness of references rests entirely with the authors. References will not be checked in detail by the Editor but papers in which errors are detected are unlikely to be accepted. Reference to work published in abstract form is allowed only in exceptional circumstances—for example, to acknowledge priority or indebtedness for ideas. References should be numbered in the order in which they are first mentioned and identified in text, tables, and legends to figures by arabic numerals above the line. References cited only (or first) in tables or legends should be numbered according to where the particular table or figure is first mentioned in the text. The list of references should be typed in double spacing and in numerical order on separate sheets. The information should include reference number, authors' names and initials (all authors unless more than six, in which case the first six names are followed by *et al*), title of article, and in the case of journal articles name of journal (abbreviated according to the style of *Index Medicus*), year of publication, volume, and first and last page numbers. The order and the punctuation are important and should conform to the following examples:

1 Anderson HR. Chronic lung disease in the Papua New Guinea Highlands. *Thorax* 1979;34:647-53.

2 Green AB, Brown CD. *Textbook of pulmonary disease*. 2nd ed. London: Silver Books, 1982:49.

3 Grey EF. Cystic fibrosis. In: Green AB, Brown CD, eds. *Textbook of pulmonary disease*. London: Silver Books, 1982:349-62.

SHORT PAPERS Short reports of experimental work, new methods, or a preliminary report can be accepted as two page papers. The maximum length of such an article is 1400 words, inclusive of structured abstract, tables, illustrations and references.

CASE REPORTS A single case can be published as a case report. It will be limited to 850 words, one table or illustration, a short unstructured abstract, and 10 references.

CORRESPONDENCE The Editor welcomes letters related to articles published in *Thorax*. These should not exceed 300 words or contain more than three references, which should be listed at the end of the letter. Letters should be typed in double spacing with wide margins and must be signed by all authors.

REPRINTS Reprints are available at cost if they are ordered when the proof is returned.

NOTICE TO ADVERTISERS Applications for advertisement space and for rates should be addressed to the Advertisement Manager, *Thorax*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9RJ.

NOTICE TO SUBSCRIBERS *Thorax* is published monthly. The annual subscription rate is £185.00 (\$309.00) worldwide. Orders should be sent to the Subscription Manager, *Thorax*, BMJ Publishing Group, BMA House, Tavistock Square, London WC1H 9RJ. Orders may also be placed with any leading subscription agent or bookseller. Subscribers may pay for their subscriptions by Access, Visa, or American Express by quoting on their order the credit or charge card preferred together with the appropriate personal account number and the expiry date of the card. For the convenience of readers in the USA subscription orders with or without payment may also be sent to *British Medical Journal*, PO Box 408, Franklin, MA 02038, USA. All inquiries, however, must be addressed to the publisher in London. All inquiries about air mail rates and single copies already published should also be addressed to the publisher in London. Second class postage paid, at Rahway New Jersey. Postmaster: send address changes to *Thorax* c/o Mercury Airfreight International Ltd Inc, 2323 Randolph Avenue, Avenel, NJ 07001, USA.

AUDIT IN ACTION

From a minority interest to an integral part of good medical practice, audit has come a long way. *Audit in Action* traces this development in a selection of articles originally published in the *BMJ*. Topics range from practical aspects of starting to audit to the wider aspects of achieving quality based on experience in the United States and Europe. The contributors are leaders in or experienced practitioners of audit. Covering audit both in hospitals and in general practice, *Audit in Action* is valuable reading for all those concerned to improve the quality of health care.

ADVANCES IN RESPIRATORY MEDICINE

15 - 19 MAY 1995

COURSE ORGANISER: DR MARGARET HODSON

This course will update physicians in important clinical developments in respiratory medicine. It is intended for respiratory physicians, general physicians and senior registrars (or equivalent) with special responsibilities for respiratory medicine. Contributors will come from many European countries.

TOPICS WILL INCLUDE

Tuberculosis and atypical mycobacterial infection, carcinoma of the bronchus, allergy, pneumonia, HIV infection and the lung, paediatric respiratory disease, gene therapy and measurement of quality of life and health economics.

SPEAKERS

Experts from the UK and guest speakers from mainland Europe

COURSE FEE: £450.00

Enquiries and payments should be made to: Conference Centre, National Heart & Lung Institute, Dovehouse Street, London SW3 6LY. Telephone: 0171 351-8172 (24 hr answering service), Facsimile: 0171 376-3442.

MANAGEMENT FOR DOCTORS

Jenny Simpson, *Chief Executive, British Association of Medical Managers*
Richard Smith, *Editor, BMJ*

Every doctor needs to know how to manage, but few receive formal training. This user friendly guide fills the gap with practical advice on all the aspects of management that doctors need to deal with.

- Written by a team of doctors and business academics
- Uses case studies to show examples of good and bad practice
- Invaluable for both hospital doctors and GPs

Topics covered include: working in teams and leadership; getting the best from people; managing change; making finance work for you
