BTS guidelines for the management of community acquired pneumonia in adults: update 2009

iii1 Synopsis of recommendations

iii6 Section 1 Introduction

- 1.1 Scope of these guidelines
- 1.2 Introduction
- 1.3 Definitions
- 1.4 What is the target end user audience?
- 1.5 What patient populations are we including and excluding?
- 1.6 What changes have happened in the area of CAP since the 2004 guidelines?
- 1.7 Guidelines Committee membership
- 1.8 How the evidence was assimilated into the guidelines
- 1.9 Grading of recommendations
- 1.10 Plans for updating these guidelines
- 1.11 Implementation of the guidelines
- 1.12 Auditing CAP management

iii10 Section 2 Incidence, mortality and economic consequences

- 2.1 How common is adult CAP in the community and in hospital?
- 2.2 What is the mortality of CAP?
- 2.3 What are the economic consequences of CAP?
- 2.4 What comments can be made about cost effectiveness of different therapies?

iii12 Section 3 Aetiology and epidemiology

- 3.1 Introduction
- 3.2 What are the causes of adult CAP in the UK?
- 3.3 What are the causes of adult CAP in similar populations elsewhere in the world?
- 3.4 How does the aetiology differ in certain geographical areas
- 3.5 Is the aetiology different in specific population groups?
- 3.6 What are the epidemiological patterns of pathogens causing CAP and is this information useful to the clinician?

iii15 Section 4 Clinical features

- 4.1 Can the aetiology of CAP be predicted from clinical features?
- 4.2 Specific clinical features of particular respiratory pathogens
- 4.3 CAP in elderly patients: are risk factors and clinical features different?
- 4.4 Aspiration pneumonia

iii17 Section 5 Radiological, general and microbiological investigations

- 5.1 When should a chest radiograph be performed in the community for patients presenting with suspected CAP?
- 5.2 When should a chest radiograph be performed in hospital for patients presenting with suspected CAP?
- 5.3 Are there characteristic features that enable the clinician to predict the likely pathogen from the chest radiograph?
- 5.4 What is the role of CT lung scans in CAP?
- 5.5 How quickly do chest radiographs improve after CAP?
- 5.6 When should the chest radiograph be repeated during recovery and what action should be taken if the radiograph has not returned to normal?
- 5.7 What general investigations should be done in a patient with suspected CAP in the community?
- 5.8 What general investigations should be done in patients admitted to hospital?
- 5.9 Why are microbiological investigations performed in patients with CAP?
- 5.10 What microbiological investigations should be performed in patients with suspected CAP in the community?
- 5.11 What microbiological investigations should be performed in patients admitted to hospital with CAP?

iii25 Section 6 Severity assessment

- 6.1 Why is severity assessment important?
- 6.2 What clinical factors and investigations are associated with a poor prognosis on univariate and multivariate analysis?

- 6.3 What predictive models for assessing severity on or shortly after hospital admission have been tested?
- 6.4 What severity assessment strategy is recommended for CAP?
- 6.5 Severity assessment of CAP in patients seen in the community
- 6.6 Severity assessment of CAP in patients seen in hospital
- 6.7 Reviewing severity status after initial assessment in hospital

iii28 Section 7 General management in the community and in hospital

- 7.1 What general management strategy should be offered to patients treated in the community?
- 7.2 What review policy should be adopted in patients managed in the community?
- 7.3 What general management strategy should be offered to patients in hospital?
- 7.4 What advice should be given regarding critical care management of CAP?
- 7.5 What arrangements should be made for follow-up after hospital discharge and by whom?

iii32 Section 8 Antibiotic management

- 8.1 Introduction
- 8.2 Antibiotic stewardship and the individual clinician's responsibility to prevent the overuse of antibiotics when managing CAP
- 8.3 Antibiotic resistance of respiratory pathogens
- 8.4 Newer antibiotics
- 8.5 Clinical studies of management and international differences in recommendations
- 8.6 Formulations of these recommendations
- 8.7 Empirical antibiotic choice for CAP treated in the community
- 8.8 Should general practitioners administer antibiotics prior to hospital transfer in those patients who need admission?
- 8.9 When should the first dose of antibiotics be given to patients admitted to hospital with CAP?
- 8.10 Empirical antibiotic choice for adults hospitalised with low severity CAP
- 8.11 Empirical antibiotic choice for adults hospitalised with moderate severity CAP
- 8.12 Empirical antibiotic choice for adults hospitalised with high severity CAP
- 8.13 When should the intravenous or the oral route be chosen?

- 8.14 When should the intravenous route be changed to oral?
- 8.15 Which oral antibiotics are recommended on completion of intravenous therapy?
- 8.16 How long should antibiotics be given for?
- 8.17 Failure of initial empirical therapy
- 8.18 Antibiotic stewardship and avoiding inappropriate antibiotic prescribing for CAP
- 8.19 What are the optimum antibiotic choices when specific pathogens have been identified?
- 8.20 Specific issues regarding the management of Legionnaires' disease
- 8.21 Specific issues regarding Pantone-Valentine Leukocidin-producing *Staphylococcus aureus*

iii43 Section 9 Complications and failure to improve

- 9.1 What factors and action should be considered in patients who fail to improve in hospital?
- 9.2 What are the common complications of CAP?

iii44 Section 10 Prevention and vaccination

- 10.1 Influenza and pneumococcal vaccination
- 10.2 Smoking cessation

iii44 Section 11 Committee membership and acknowledgements

- 11.1 Membership of the BTS Community Acquired Pneumonia Guidelines Committee and affiliations
- 11.2 Authorship of sections of the guidelines
- 11.3 Acknowledgements
- 11.4 Declarations of interest

iii45 References

iii54 Appendix 1 Checklist used by reviewers for appraising studies

iii54 Appendix 2 Additional checklist used for appraising studies to inform pneumonia aetiology

iii55 Appendix 3 Types of study and levels of evidence used to illuminate specific clinical questions

iii55 Appendix 4 Generic levels of evidence and guideline statement grades, appropriate across all types of clinical questions
