Editorials

- 1 *Thorax: the Cappuccino years*
A Bush, I D Pavord
- 5 Tiotropium Respimat increases the risk of mortality
C R Jenkins, R Beasley
- 7 Hot off the breath: Omalizumab: NICE to USE you, to LOSE you NICE
A Bush, I D Pavord

Asthma

- 9 The activin A antagonist follistatin inhibits asthmatic airway remodelling
C L Hardy, H-An Nguyen, R Mohamud, J Yao, D Y Oh, M Plebanski, K L Loveland, C A Harrison, J M Rolland, R E O'Hehir
- 19 Clinical control of asthma associates with measures of airway inflammation
 *F Volbeda, M Broekema, M E Lodewijk, M N Hylkema, H K Reddel, W Timens, D S Postma, N H T ten Hacken*

Asthma and the environment

- 25 Cod liver oil intake and incidence of asthma in Norwegian adults—the HUNT study
X-M Mai, A Langhammer, Y Chen, C A Camargo Jr
- 31 Proteolytic activity in cowshed dust extracts induces C5a release in murine bronchoalveolar lavage fluids which may account for its protective properties in allergic airway inflammation
M Stiehm, A Bufe, M Peters

Bronchiectasis

- 39 Vitamin-D deficiency is associated with chronic bacterial colonisation and disease severity in bronchiectasis
J D Chalmers, B J McHugh, C Docherty, J R W Govan, A T Hill

Chronic obstructive pulmonary disease

- 48 Comparative safety of inhaled medications in patients with chronic obstructive pulmonary disease: systematic review and mixed treatment comparison meta-analysis of randomised controlled trials
Y-H Dong, H-H Lin, W-Y Shau, Y-C Wu, C-H Chang, M-S Lai

Interstitial lung disease

- 57 The development and validation of the King's Sarcoidosis Questionnaire for the assessment of health status
A S Patel, R J Siegert, D Creamer, G Larkin, T M Maher, E A Renzoni, A U Wells, I J Higginson, S S Biring

Respiratory infection

- 66 Human respiratory syncytial virus viroporin SH: a viral recognition pathway used by the host to signal inflammasome activation
K Triantafyllou, S Kar, E Vakakis, S Kotecha, M Triantafyllou
- 76 Respiratory syncytial virus infection of airway epithelial cells, in vivo and in vitro, supports pulmonary antibody responses by inducing expression of the B cell differentiation factor BAFF
P S McNamara, A M Fonceca, D Howarth, J B Correia, J R Slupsky, R E Trinick, W Al Turaiki, R L Smyth, B F Flanagan

Respiratory research

- 82 IL-25 drives remodelling in allergic airways disease induced by house dust mite
 *L G Gregory, C P Jones, S A Walker, D Sawant, K H C Gowers, G A Campbell, A N J McKenzie, C M Lloyd*

Cover caption: Respiratory syncytial virus (RSV) particles, coloured transmission electron micrograph (TEM). This pneumovirus, a type of paramyxovirus, is a major cause of human respiratory tract infections in patients of all ages. Each virion consists of RNA (ribonucleic acid) genetic material enclosed in a protein coat, or capsid (orange), within a phospholipid envelope (cream). The envelope is covered in protein spikes (green), which enable the virus to attach to and enter a host cell. In adults, RSV only affects the upper respiratory tract, but in infants bronchiolitis (bronchiole inflammation) or bronchopneumonia can result. Magnification: x118,000 when printed 10 centimetres wide.
