

# **BSTI Post-COVID-19 CXR Report Codes**

## **COVID-19-related Findings**

#### Resolved (PCVCX0)

Normal/No significant persisting COVID changes/Return to Pre-COVID baseline

#### Significantly improved (PCVCX1)

≥ 50% abnormalities have resolved (extent and/or density of opacification)

#### Not significantly improved or unchanged<sup>+</sup> (PCVCX2)

< 50% abnormalities have resolved (extent and/or density of opacification)

# Worsening\* (PCVCX3)

Development of fibrosis, even if alveolar opacity has improved/Deteriorating alveolar opacity

#### Other findings

### (PCVCX4)

Lung malignancy<sup>+</sup>; Pneumothorax; Pneumomediastinum; New non-COVID-19 infection / Pleural effusion(s)

<sup>†</sup> If any suggestion of malignancy refer to cancer services as per local pathways
