Volume 77 Issue 12 | THORAX December 2022

Editorials
1159 Immunotherapy in non-small-cell lung cancer: new data support its use, but some challenges remain
A Ramos-Esguivel

1161 Chronic neonatal lung disease: time to look beyond the alveolus
A Ge, J Toelen

Lung cancer
1163 Impact of PD1 and PDL1 immunotherapy on non-small cell lung cancer outcomes: a systematic review
S S Kanabar, A Tewari, V Soran, P Balaadur, M Price, A M Turner

Respiratory research
1176 Relationship between impaired BMP signalling and clinical risk factors at early-stage vascular injury in the preterm infant

Asthma
1187 Effects of switching from a metered dose inhaler to a dry powder inhaler on climate emissions and asthma control: post-hoc analysis
A Woodcock, C Janson, J Rees, I Frith, M Löfdahl, A Moore, M Hedberg, D Leather

Tuberculosis
1193 Performance of QuantiFERON- TB Gold Plus assays in children and adolescents at risk of tuberculosis: a cross-sectional multicentre study

1202 Effect modification of greenness on PM4 associated all-cause mortality in a multidrug-resistant tuberculosis cohort
E Ge, J Cao, X Wei, Z Ren, J Wei, X Liu, X Wang, J Zhong, J Li, X Tian, F Fei, B Chen, X Wang, Y Peng, M Liao, J Lei

1210 High-dose rifampicin in the treatment of TB: a systematic review and meta-analysis
O A Arby, J M Kim, M Yan, K Romanowski, J R Campbell, A Trajman, L Asadi, F Fregoneze, N Winters, D Menzies, J C Johnston

Respiratory infection
1220 Multicentre evaluation of two multiplex PCR platforms for the rapid microbiological investigation of nosocomial pneumonia in UK ICUs: the INHALE WP1 study
V I Enne, A Aydin, R Baldan, D R Owen, H Richardson, F Ricciard, C Russell, B O Nanniuk-Keij, A M Swart, J High, A Colles, J Barber, V Gaunt, D M Livermore, J O’Crady, INHALE WP1 Study Group

Intestinal lung disease
1237 Relative environmental and social disadvantage in patients with idiopathic pulmonary fibrosis
Nama Avitzur, E M Neth, M Lamidi, S D Nathke, H RCollard, A M DoDent, N Thaker, K A Johannson

MORE CONTENTS

Cover caption: Lung directed antibody gene transfer confers protection against SARS-CoV-2 infection (see Du Y, et al. page 1235)
