Volume 77 Issue 2 | THORAX February 2022

Airwaves
107 Highlights from this issue
The Triumvirate

Editorials
108 Central sleep apnoea in heart failure: one size does not fit all
W J Randerath, M Arzt

110 Returning to work following critical illness: milestone or millstone?
B Connolly

112 Apples to apples? Comparative analyses of national CF registries
L M Perem, P McNally, F Rajier

Commentary
114 Circulating cell-free double-stranded DNA and metabolic derangements in idiopathic pulmonary fibrosis: a new association
Y P Moodley

Chronic obstructive pulmonary disease
115 Blood RNA sequencing shows overlapping gene expression across COPD phenotype domains
A J Chosh, A Safaei, S Lee, R Chase, M Moll, J Morrow, Y Jun, P J Castaldi, C P Hersh

Critical care
123 Association of imbalance between job workload and functional ability with return to work in ARDS survivors

129 RAND appropriateness panel to determine the applicability of UK guidelines on the management of acute respiratory distress syndrome (ARDS) and other strategies in the context of the COVID-19 pandemic

Cystic fibrosis
136 Lung function in children with cystic fibrosis in the USA and UK: a comparative longitudinal analysis of national registry data

Interstitial lung disease
143 Prospective nationwide multicentre cohort study of the clinical significance of autoimmune features in idiopathic interstitial pneumonias

Respiratory infection
154 Clinical phenotypes and outcomes of SARS-CoV-2, influenza, RSV and seven other respiratory viruses: a retrospective study using complete hospital data
P Hedberg, J Karlsson Valkå, S van der Werff, H Tanushi, A Requena Mendez, F Granath, M Bell, J Mårtensson, R Dyrdak, O Hernting, A Färner, A Ternhag, P Nauller

More contents

Cover caption: Respiratory epithelial cell responses to SARS-CoV-2 in COVID-19 (see Bridges JP, et al, page 206)

This article has been chosen by the Editors to be of special interest or importance and is freely available online.

This article has been made freely available online under the BMJ Journals open access scheme. See http://authors.bmj.com/open-access/
Respiratory epidemiology
164 Impact of lung function on cardiovascular diseases and cardiovascular risk factors: a two sample bidirectional Mendelian randomisation study
S L Au Yeung, M C Borges, D A Lawlor, C M Schooling

172 Breathlessness across generations: results from the RHINESSA generation study

Sleep
178 Adaptive servo ventilation for sleep apnoea in heart failure: the FACE study 3-month data
R Tamisier, T Daney, S Bailly, J-M Davy, J Verbraecken, F Lavergne, A Palot, F Goutorbe, M-P d’Ortho, J L Pépin, FACE study investigators

Brief communications
186 Association of circulating cell-free double-stranded DNA and metabolic derangements in idiopathic pulmonary fibrosis
W Whalen, M Buyukozkan, B Moore, J-S Moon, C S Dela Cruz, F J Martinez, A M K Choi, J Krumsiek, H Stout-Delgado, S J Cho

191 Different responses of the oral, nasal and lung microbiomes to cigarette smoke
S Pfieffer, C Herzmann, K I Gaede, D Kovacevic, S Krauss-Etschmann, M Schloter

196 Combining clinical, radiological and genetic approaches to pneumothorax management

199 Derivation of a prototype asthma attack risk scale centred on blood eosinophils and exhaled nitric oxide
S Couillard, A Laugerud, M Jabeen, S Ramakrishnan, J Mélhorn, T Hinks, I Pavord

State of the art review
203 Respiratory epithelial cell responses to SARS-CoV-2 in COVID-19
J P Bridges, E K Vladar, H Huang, R J Mason

Images in Thorax
210 COVID-19 pneumonitis and cystic lung disease, pneumothorax and pneumomediastinum
S Everden, I Zaki, G Trevelyan, J Briggs

Journal club
213 Journal club
S Singh
