Contents

Lung cancer

467 Impact of time-to-treatment on survival for advanced non-small cell lung cancer patients in the Netherlands: a nationwide observational cohort study
S E Klarenbeek, M J Aarts, M M van den Heuvel, M Proeyen, M Tummers, O C J Schuurbers

Paediatric lung disease

476 Minimal important difference in childhood interstitial lung diseases
M Gisn, N Schwerk, J Carlsen, M Wetzeke, N Emmalioglou, N Kijer, Lange, K Krenke, chILD collaborators, E Seidl

Rehabilitation

484 Bronchopulmonary dysplasia and expiratory airflow at 8 years in children born extremely preterm in the post-surfactant era
I W Doyle, S Reagansathan, J Cheong, The Victorian Infant Collaborative Study Group

Respiratory epidemiology

496 Mendelian randomisation of eosinophils and other cell types in relation to lung function and disease

Environmental exposure

459 Short-term exposure to ambient air pollution and individual emergency department visits for COVID-19: a case–crossover study in Canada
E Lavigne, N Ryti, A Gasparini, F Sera, S Weichenthal, H Chen, T To, G J Evans, L Sun, A Dheri, L Lemogo, S O Knotch, D Spielmanns

Chronic obstructive pulmonary disease

442 Using a smartphone application maintains physical activity following pulmonary rehabilitation in patients with COPD: a randomised controlled trial

Asthma

342 Novel genetic variants associated with inhalertocorticosteroid treatment response in older adults with asthmas

Editorials

427 Should we retain smaller growing nodules in lung cancer screening programmes for surveillance?
M Ruparel

429 Elucidating minimal important difference in childhood interstitial lung diseases S-P Jerks, J Schulte

430 ICS/formoterol maintenance and reliever therapy: how far beyond asthma?
R Beasley, P Bruce, L Hatter
