Participant characteristics for all participants in the review; mean age was 65.9 years, 38% of participants were female; COPD groups mean FEV¹ was 42.4%, age was 66.5, 35.2% were female; control groups mean FEV1 was 101.3%, age was 65.2, 38.4% were female.

Study sample sizes range: n=30-1504. Total sample size in review: n=2751 patients with COPD.

*median (IQR), **confirmed with authors, some participants data used in both papers for this outcome

TUG = timed up and go, SLS = single leg stance, BBS = berg balance scale
