

Supplementary figure 1 – Prevalence of viruses over time. Relative frequency of respiratory syncytial virus (white bars) metapneumovirus (black bars) and influenza virus (striped bars) in cases over time. Dashed line indicates total number of sampled cases (right y-axis). Abbreviations: Flu, influenza virus; hMPV, metapneumovirus; RSV, respiratory syncytial virus.

Epidemiology of Influenza, Metapneumovirus and RS Virus in Children with Community-Acquired Pneumonia
