

Clinical Data:

Sex

Age at date of sample collection

Date sample collected and stored

Type of sample

Mesothelioma sub type

Ethnicity

Asbestos Exposure Known Yes/No

Age at first exposure

Duration of exposure

Occupation

Family History

Family history of mesothelioma

Patient history of malignancy

Other first degree relative history of malignancy

Smoking History

Current/Ex/Never

Age started

Pack years

Investigations at diagnosis

Full blood count

Creatinine

Serum Mesothelin

Type of biopsy

Biopsy site

Cell type

IHC markers (Positive/negative)

BerEP4
Calretinin
CEA
CK5/6
EMA
Pancytokeratin
WT-1

Stage at donation (TNM)

Treatment

Surgery
Extra-pleural pneumonectomy/radical pleurectomy/VATS pleurectomy
Chemotherapy; Neo-adjuvant/Adjuvant
Pemetrexed; Cisplatin; Carboplatin; Other
No of cycles
Chemotherapy; second line
Pemetrexed; Cisplatin; Carboplatin; Other
No of cycles
Radiotherapy
Radical
Palliative
Prophylactic irradiation of tracts

Participation in clinical trial – name of trial

Alive/Dead

Months from diagnosis to death

Cause of death
